

Cataloging Step-By Step

Go to the “Advanced Search”

Set Library to All Libraries

The screenshot shows the 'Advanced Search' page. At the top, there's a search bar with the placeholder 'Enter a search term'. To its right are two dropdown menus: 'ALL of these words' and 'All Headings', followed by an 'Add' button. Below the search bar, there are two more dropdowns: 'Search by Date Items Added -' with 'No Date Limit' selected, and 'Sort Order -' with 'Relevance' selected. A 'Search' button is located below these. On the left side, under the 'Filters' section, there is a list of filter categories: 'Libraries - All Libraries', 'Year of Publication - All', 'Formats - All', 'Material Type - All', and 'Audience Level - All'. A red arrow points to the 'Libraries - All Libraries' option.

Search by ISBN whenever possible. If material is not found try by title.

Add holding info

The screenshot shows the cataloging interface. At the top, there's a section for 'Add holding info' with the following details: Co-Author: Nelson, Sandra S. New planning for results. Co-Author: Public Library Association. Series Title: PLA results series. Electronic Location: Table of contents only. Below this is a table with three columns: Location, Call Number, and Status. The table contains two rows of data. To the right of the table is a button labeled 'Add New Item Record', which is highlighted by a red arrow.

Fixing the 007 is the important thing for Videocassettes, DVD's and Blu Rays. Also for Large Print.

Field 007 - Physical description

Current contents:
vd-mvaizs

00 - Category of material:
v (Videorecording)

Data elements:

- 01 - Specific material designation
- 02 - Undefined
- 03 - Color
- 04 - Videorecording Format
- 05 - Sound on medium or separate
- 06 - Medium for sound
- 07 - Dimensions
- 08 - Configuration of playback channels

Edit OK Cancel

The choices in the Data Elements change depending on the Category of material

Video Recording brings up "Specific Material Designation"

Indicate videodisc or video cassette

The "04 Videorecording Format" brings up choices of the kinds of formats

We would use either VHS (1/2 in. videocassette), Blu-ray or DVD.

Those are the only ones you need to adjust. Leave the others as they are.

For Large print Choose "Text" for the "Category of Material"

And "Large Print" under "Specific Material Designation"

Don't worry about doing an 007 for regular print books, it is set to default there.

The 008 is more complicated but not as important as the 007 if you don't use it.

Running Reports

The reports we need for this are under Circ Reports. Run Reports

The Bibs Without Items report does not work at this time. Do NOT use this report.

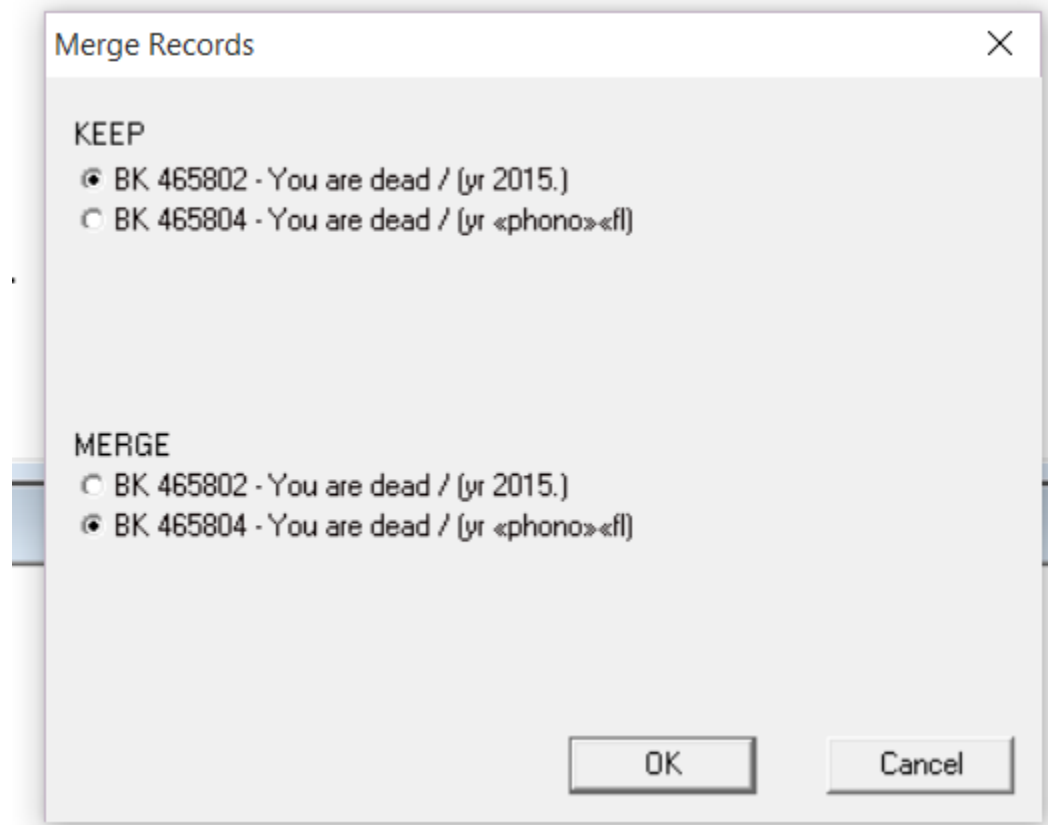

Please run the "Brief Bibs from Circulation" report.

This will tell you the records that are in as ZZZBrief that need to be changed to full records.

The report will come as an Excel spreadsheet. To fix these records go to the Advanced Search function, set to "All Libraries" and see if there is a full record that matches your material. Merge your record by going to the Record Tab and clicking "Merge Records"

It will pop up a box with the two numbers. Keep the good record merge the brief record.

The other report to run is a "Locations Holdings" for 2 locations:

"Technical Services"

"Technical Services—Cataloger Review"

You might have some old record you have added in another way stuck there.

Proceed to fix or merge the records as needed.
